Education

Indiana University Bloomington – Luddy School of Informatics, Computing & Engineering

May 2027

B.S in Computer Science | Minors: Business, Data Science | AI Specialization

GPA: 3.86/4.0

Honors: IT Consultant of the Month November '24, Dean's list (3x)

Relevant Coursework: Data Structures, Intro to Artificial Intelligence, Principles of Machine Learning, Data Analysis and Mining

Involvements: EY & Deloitte Technology Consulting Awareness Program | Kappa Theta Pi | Luddy Consulting Association | TA for Vibe and AI Programming Class

Technical Skills

- **Programming:** Python, HTML, CSS, Java, C/C++, Swift, JavaScript, SQL, Ruby
 - **Other:** TensorFlow, PyTorch, SAP, Oracle, MLflow, Docker, React.js, Linux, Unix, ServiceNow, MongoDB, AWS
 - **Certifications:** AWS Certified Cloud Computing Practitioner
-

Work Experience

University Information Technology Services | IT Consultant Supervisor | Indiana University

Oct 2024 – Present

- Leveraged **ServiceNow** workflows and reporting dashboards to oversee campus technology infrastructure, efficiently processing **12,000+ tickets** per month and driving data-driven decision making and initiative-taking issue resolution.
- Optimized team deployment using capacity analysis and performance metrics, enhancing service delivery **by 5% in 5 months**.
- Facilitated weekly performance coaching sessions using **structured feedback frameworks** and implemented **competency-based skills assessments** for **25+** technical support consultants.

Future Wonder Co. | AI Charioteer Intern | Bloomington, IN

June 2025 – August 2025

- Led development team using **Agile workflows** to engineer custom AI-supported reporting software with **Python**, deployed via **AWS Lambda** with **Docker** containerization and designed **3 REST APIs**. Integrated with **GitLab** for code hosting, **Clockify** for time tracking data, and **Slack** for automated financial report distribution to company finance teams, reducing work from **3-4 hours to 30 minutes** per week.
- Evaluated **emerging AI technologies** including **Cursor & Windsurf** for code generation, **reviews**, and **unit testing**, created AI-assisted coding guidelines adopted by development team on client projects, reducing **MR review time by 15%**.
- Drafted contract addendums and established **AI compliance requirements** through **cross-functional meetings** using **regulatory frameworks**, achieving **100%** client contract compliance.
- Conducted extensive **prompt engineering** research across **LLMs, NLP/NLU** and implemented refined prompt templates with the **6 - member development team** through weekly **Agile standups**, improving response accuracy by **40%**.

Steel and Tube Industries Ltd. | Software Engineer Intern | Uganda

Feb 2023 – July 2023

- Analyzed financial and sales data using **SAP ERP** and established automated data validation workflows across production, sales and finance departments, improving cross-departmental data consistency by **12%** and reducing reporting time.
 - Engineered specialized **Python** software to automatically calculate optimal zinc coating weights, replacing manual processes in stainless steel manufacturing, elevating product quality and manufacturing effectiveness by **10%**.
 - Pioneered integration of social media features into the **e-commerce** platform, boosting sales by **15%** in 5 months.
-

Projects

PixelScout | Python, TensorFlow/Keras, NumPy, Matplotlib

June 2024 – Present

- Innovated a **CNN-based** image classification system with **TensorFlow/Keras**, achieving **95%** accuracy on CIFAR-10 dataset and reducing manual classification time through modular design and automated processing.

[EazyFlow](#) | Personal Project

May 2024 – Jan 2025

- Engineered an AI-driven traffic system with **python**, integrating data from **500+** smart intersections. Used **NumPy** and **scikit-learn** for data handling and predictive modeling, optimizing traffic flow, reducing wait times, and cutting emissions.

[AveMenu](#) | Personal Project

April 2024 – August 2024

- Developed a full-stack restaurant system using **JavaScript, HTML/CSS, Node.js/Express**; featuring responsive UI, real-time order tracking, **RESTful API**, and modular design that optimized operations and enhanced user experience.

[ALDI AI Team Case Competition Winner](#) | Business in Computing BUS-K201, Indiana University

Jan 2024 – May 2024

- Performed **SWOT analysis** and **operational audit** of retail processes, developing **AI-powered recommendations** presented at **ALDI HQ** with projected **4-8%** sales boost.
-

Leadership Involvement

National Society of Black Engineers (NSBE) | Vice President | Indiana University

April 2024 – Present

- Organized fundraising events which boosted chapter participation in regional and national NSBE conferences by **40%**.
 - Developed retention workshops and networking events to boost member acquisition, driving 30%-chapter growth.
-
